RE: Eglin Force Base
EPA ID Number: FL8 570 024 366
Operating/Corrective Action Permit 006176-007-HO
Okaloosa County

Dear Colonel Johnson and Colonel Azzano:

Enclosed is Permit Number 006176-007-HO to continue operation of two miscellaneous units (96) and to continue facility-wide Corrective Action. This permit is being issued pursuant to Section 403.722, Florida Statutes (F.S.), and Chapters 62-4, 62-160, 62-730, and 62-780, Florida Administrative Code (F.A.C.).

This permit is final and effective ("issued") on the date filed with the Clerk of the Department. When the permit is final, any party to the permit has the right to seek judicial review of the permit pursuant to Section 120.68, F.S., by the filing of a Notice to Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Office of General Counsel, Department of Environmental Protection, 3900 Commonwealth Boulevard, MS #35, Tallahassee, Florida 32399-3000; and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal.

The Notice of Appeal must be filed within thirty (30) days from the date the final permit is issued. If you should have any questions, please contact Camille Stein at (850)245-8791 or Camille.stein@dep.state.fl.us.

Colonel Craig Johnson
Colonel Christopher Azzano

Air Base Wing/Civil Engineering
Commander, Operator

COUNTY: Okaloosa
PROJECT: Operation of Two Miscellaneous Units (96)
and Continuation of Corrective Action (Group)
Requirements

Pursuant to authorization obtained by the Florida Department of Environmental Protection (FDEP) under the Resource Conservation and Recovery Act [42 United States Code (U.S.C.) 6901, *et seq.*, commonly known as RCRA] and the Hazardous and Solid Waste Amendments of 1984 (HSWA), this permit is issued under the provisions of Section 403.722 Florida Statutes (F.S.), and Chapters 62-4, 62-160, 62-730, 62-777 and 62-780 Florida Administrative Code (F.A.C.). This permit replaces expired permit 6176-HO-006. The above-named Permittee is hereby authorized to perform the work or operate the facility shown on the application March 4, 2015, and revised or supplemented by submissions dated August 26, 2015 and January 4 2016 that are incorporated herein and collectively referred to as the "permit application." The permit application also includes any approved drawing(s), plans, and other documents that are specifically identified and incorporated by reference. Solid waste management units (SWMUs) and areas of concern (AOCs) identified to date are listed in Appendix A. The RCRA-regulated units, permitted units or permitted activities are specifically described as follows.

Eglin Air Force Base (Eglin AFB) addresses its responsibilities under this permit within two distinct organization entities: the Eglin AFB 96 Civil Engineering Group Environmental Compliance (**Compliance-96 CEG/CEIEC**) and the Eglin AFB Environmental Restoration Program (**Restoration-96 CEG AFCEC/CZOE**). With the assistance of staff from these programs, the Department has identified the conditions of this permit that pertain to these programs. The specific permit conditions have been annotated to indicate internal Eglin AFB responsibility. These annotations are intended as guidance to assist Eglin AFB in complying with the conditions of this permit and are neither binding nor enforceable.

Similarly, the Department addresses its responsibilities under this permit within two distinct organizational entities: Hazardous Waste Program and Permitting

(HWPP) and the Federal Facilities Program. The HWPP is responsible for permitting and oversight of the identified regulated units (Compliance-96 CEG/CEIEC). The Federal Facilities Program oversees the remedial activities conducted by Restoration-96 CEG AFCEC/CZOE. This permit will identify the specific activities overseen by the Federal Facilities Program.

This permit addresses two regulated units (Compliance 96 CEG/CEIEC) and the corrective action requirements associated with multiple SWMUs and AOCs (Restoration 96 CEG AFCEC/CZOE).

(Compliance 96 CEG/CEIEC) Eglin AFB and other Department of Defense units in the region (Hurlburt Field, Tyndall AFB, Pensacola NAS, Panama City NSA) generate hazardous waste explosives and military munitions that are no longer suitable for service. The safest method of handling these items is treatment at Eglin AFB. Eglin AFB will open burn and open detonate waste military explosives on Ranges C-62 and C-52 North (N) (Appendix A.8).

The open burn units are specially-designed burn kettles with a detachable fuel source. The individual burn kettle is designed for thermally treating reactives or propellants, explosives, and pyrotechnics (PEP-type) wastes. It is a vented, steel box with a removable lid that has been designed to contain metal fragments plus much of the solid combustion residues. The PEP-loaded burn kettles are placed onto the retracted carbottom of the Transportable Burn Kettle Processor (TBKP) and then the loaded carbottom is moved back into the TBKP's thermal processing chamber. The chamber door is closed and the insulated processing chamber is then heated up until the burn kettle(s) are approximately 1000°F. This temperature will ensure that all PEP waste inside the burn kettles has been thoroughly destroyed. This operation occurs on Range C-62 however Range C-52N is an alternate location.

Open Detonation (OD) operations occur at locations on Range C-52N and Range C-62 directly on the ground surface. Soon after the OD unit can be safely approached following completion of a detonation (generally within one hour of the detonation), the OD unit is inspected for any items, which remain after detonation. Negligible energetic material is detonated immediately. Large metallic items not containing energetic materials are transported to the TBKP for burning and then offered for recycle/resale.

(Restoration 96 CEG AFCEC/CZOE) Eglin AFB continues to address the corrective action requirements at the SWMUs and AOCs identified in Appendices A.1 through A.7.

The Permittee is required to investigate any releases of contaminants to the environment at the facility regardless of the time at which waste was placed in a unit and to take appropriate corrective action for any such releases. Pursuant to 40 Code of Federal Regulations (CFR) 260.10 [as adopted by reference in Subsection 62-730.020(1), F.A.C.], the corrective action requirements of this

RCRA permit extend to all property under control of the Permittee (see Attachment A, a map of the property boundaries of the land under the Permittee's control) and to all contamination that originated from discharges at the property under control of the Permittee.

This permit is based on the premise that information and reports submitted by the Permittee prior to issuance of this permit are accurate. Any inaccuracies found in this information or information submitted as required by this permit may be grounds for termination or modification of this permit in accordance with Section 403.727(3)(a) F.S. and Rule 62-730.290, F.A.C., and potential enforcement action.

The facility is located at Eglin Air Force Base, Florida.

The following documents were used in the preparation of this permit.

1. Renewal Permit Application dated April 11, 2001.
2. Renewal Application dated February 27, 2006.
3. Permit Application Changes dated April 11, 2007.
4. Renewal Application dated February 23, 2010.
5. Renewal Application dated March 5, 2015.
6. Additional Information submitted on July 18, 2001, August 31, 2001 and September 21, 2001.
7. **Applicability of Subparts AA, BB and CC to Burn Kettles** dated March 3, 2004.
8. **Human Health Risk Assessment/Fate and Transport** on October 1, 2002.
9. **Minutes of February 20, 2004 Meeting.**
10. **Basewide Environmental Restoration Workplan; Eglin Air Force Base, Rev 5**, dated December 2012 (or most current), including updated appendices and Eglin Standard Operating Procedure (ESOP) No. 19 Quality Assurance Project Plan Development.
11. **Guidelines for COPC Identification Revision 7**, dated April 2014 (or most current).
12. **Sites Status Report** dated February 2015 (or most current).
13. **Land Use Controls Reconciliation Letters for 22 IRP Sites (DP-9, DP-257, DP-261, DP-268, FT-28, LF-05, LF-08, LF-10, LF-51, OT-83, OT-100, OT-262, OT-263, OT-264, OT-265, OT-269, OT_270, OT-271, SS-01, SS-25, SS-26, and SS-86) at Eglin, each letter addressed to FDEP and dated May 12, 2012.**

Note: Eglin Air Force Base (Eglin AFB) addresses its responsibilities under this permit within two distinct organization entities: the Eglin AFB 96 Civil Engineering Group Environmental Compliance (Compliance-96 CEG/CEIEC) and the Eglin AFB Environmental Restoration Program (Restoration-96 CEG AFCEC/CZOE). The Compliance Program manages the RCRA Subpart X Units. The Restoration Program manages the HSWA corrective units. With the assistance of staff from these programs, the Department has identified the conditions of this permit that pertain to these programs. The specific permit conditions have been annotated to indicate internal Eglin AFB responsibility. The conditions where neither program is specifically indicated apply to both programs. These annotations are intended as guidance to assist Eglin AFB in complying with the conditions of this permit and are neither binding nor enforceable.

PART I – GENERAL AND STANDARD CONDITIONS

1. The terms, conditions, requirements, limitations and restrictions set forth in this permit are “permit conditions” and are binding and enforceable pursuant to Sections 403.141, 430.727, or 403.859 through 403.861, F.S. The Permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.
2. This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings, exhibits, specifications or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.
3. As provided in Sections 403.087(6) and 430.722(5), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations. This permit is not a waiver of or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in this permit.
4. This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.
5. This permit does not relieve the Permittee from liability for harm or injury to human health or welfare, animal or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the Permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department.
6. The Permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed and used by the Permittee to achieve compliance with the conditions of this permit, as required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems

when necessary to achieve compliance with the conditions of the permit and when required by Department rules.

7. This permit or a copy thereof shall be kept at the work site of the permitted activity. In the event that there is no building or reasonable repository for such a copy at the work site, an alternate location must be approved by the Department in writing.
8. The Permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at reasonable times, access to the premises where the permitted activity is located or conducted for the activities below. Reasonable time may depend on the nature of the concern being investigated.
 - a. Have access to and copy any records that must be kept under conditions of the permit.
 - b. Inspect the facility, equipment, practices, or operations regulated or required under this permit.
 - c. Sample or monitor any substances or parameters at any time or location reasonably necessary to assure compliance with this permit or Department rules.
9. The conditions in this permit shall take precedence over the permit application documents where there are differences between those documents and the permit conditions.
10. In accepting this permit, the Permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of the permitted activity which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted activity arising under the Florida Statutes or Department rules, except where such use is prescribed by Section 403.111 and 403.73, F.S. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.
11. The Permittee agrees to comply with changes in Department rules and Florida Statutes after a reasonable time for compliance; provided, however, the Permittee does not waive any other rights granted by Florida Statutes or Department rules. A reasonable time for compliance with a new or amended surface water quality standard, other than those standards addressed in Rule 62-302.500, F.A.C., shall include a reasonable time to obtain or be denied a mixing zone for the new or amended standard.
12. The Permittee shall comply with the following notification and reporting requirements.
 - a. If for any reason the Permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the Permittee shall immediately provide the Department with the following information.
 - (1) A description of and cause of noncompliance.
 - (2) The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the noncompliance. The Permittee shall be responsible for any and all damages

which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.

- b. The Permittee will report any event requiring emergency response or noncompliance that may endanger human health or the environment from fires and explosions or releases of hazardous waste that may endanger public drinking water supplies. The Permittee will report to the Department verbally within 24 hours, and provide a written report of the incident to the Hazardous Waste Program & Permitting Section at the address in Part I.15 or by alternate means (*e.g.*, e-mail) as approved by the Department, within five calendar days. It is the responsibility of the Permittee to ensure receipt of the written report. The Department of Environmental Protection's 24-hour emergency telephone number is (850) 413-9911 or (800) 320-0519. During normal business hours, the DEP District Office may be contacted at (850) 595-8300 (Pensacola).
- (1) The verbal report shall include the following information.
 - (a) The name, address, I.D. number, e-mail address, and telephone number of the facility and its owner or operator.
 - (b) The date, time, and type of incident.
 - (c) The identity and quantity of materials involved.
 - (d) The extent of any injuries.
 - (e) An assessment of actual or potential hazards.
 - (f) The estimated quantity and disposition of recovered materials.
 - (2) The written report shall include all of the information in the verbal report and the following information.
 - (a) A description and cause of the noncompliance.
 - (b) If not corrected, the expected time of correction, and the steps being taken to reduce, eliminate, and prevent recurrence of the noncompliance.
- c. (Restoration 96 CEG AFCEC/CZOE) Within 15 calendar days of discovery per Part V.1.b, the Permittee shall notify the Department in writing of any newly discovered release(s) of contaminant(s) to the environment resulting in a de Minimis cleanup (Part V.4) or a suspected new AOC(s) and/or SWMU(s) discovered during the course of groundwater monitoring, field investigations, environmental audits, or other means.
- (1) The notification shall include, at a minimum, the location of the release, AOC or SWMU (hereinafter referred to collectively as "site"), and all relevant information (*e.g.*, location of site(s) on a map of appropriate scale; general dimensions of affected area; media affected; hazardous constituents released; and magnitude of release).
 - (2) The Department may conduct, or require that the Permittee conduct, confirmatory sampling in order to determine whether contamination is present (Part V.A.3). The Department will notify the Permittee in writing of the final determination as to the status of the newly discovered or suspected site.

- (3) Depending upon the type of discovery, notification requirements of Part I.12.b may also be required.
 - d. The Permittee shall comply with the “Notices” provisions of Rules 62-780.220, F.A.C., and 62-730.225, F.A.C.
 - (1) Prior to performing field activities.
 - (2) When contamination beyond the facility boundary is confirmed by laboratory analysis.
 - (3) When a Temporary Point of Compliance (TPOC) is established beyond the boundary of the source property in conjunction with monitored natural attenuation or active remediation.
 - (4) When a fifth year update to the status of a TPOC is issued.
 - (5) By placing warning signs at facilities where there may be a risk of exposure to the public of environmental media contaminated with hazardous waste.
 - e. The Permittee shall give written notice to the Department at least 15 days prior to physical alterations or additions to the facility that could affect activities covered by this permit. The notice shall include a summary description of the project, an evaluation of the effect it will have on: the operation of a hazardous waste facility, postclosure care, the ability to investigate contamination at or from a contaminated site, and an evaluation of the effect it might have on the known or suspected contamination.
 - f. Operating and Postclosure Permittees that generate hazardous waste, and all HSWA Corrective Action Permittees that are also a large quantity generator (LQG) of hazardous waste, shall submit a Biennial Report covering facility activities during the previous calendar year by March 1 of each even numbered year pursuant to Chapter 62-730, F.A.C. (This is a basewide requirement reflecting its hazardous waste generating status.)
13. The Permittee shall comply with the following recordkeeping requirements.
 - a. Upon request, the Permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
 - b. The Permittee shall hold all information required by the permit at the facility or other location designated by this permit. This includes records of all monitoring information (including all calibration and maintenance records and all original recordings for continuous monitoring instrumentation); copies of all reports; records of all data used to complete the permit application; and all monitoring data required by 40 CFR Part 264 and Part IV and when applicable, Part VI of this permit when applicable. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule. Any Remedial Action Plan as applicable for each contaminated site shall be held until a Site Rehabilitation Cleanup Order is issued.
 - c. Records of monitoring information shall include all required items in Chapter 62-160, F.A.C., and the following information.

- (1) The date, exact place, and time of sampling or measurements.
 - (2) The person responsible for performing the sampling or measurements.
 - (3) The dates that analyses were performed.
 - (4) The person responsible for performing the analyses.
 - (5) The analytical techniques or methods used.
 - (6) The results of such analyses.
- d. If the Permittee generates hazardous waste, the Permittee shall retain a copy of all notices, certifications, demonstrations, waste analysis data, and other documentation produced to comply with land disposal restrictions (40 CFR Part 268 and Rule 62-730.183, F.A.C.) for at least three years from the date that the waste which is the subject of such documentation was last sent to an on-property or off-property facility for treatment, storage, or disposal, or until remedial activity is completed, whichever date is later. These periods may be extended by request of the Department at any time and are automatically extended during the course of any unresolved enforcement action regarding this facility.
14. Within the timeframe requested by the Department, the Permittee shall furnish any information required by law which is needed to determine compliance with the permit. If the Department's request does not include a timeframe, the time of response is 30 days. If the Permittee becomes aware that the relevant facts were not submitted or were incorrect in the permit application or any report submitted to the Department, such facts or information shall be corrected promptly.
15. Except as otherwise specifically provided in this permit, all submittals in response to permit conditions shall be provided as described below. Submittals may be directed to alternative addresses (*i.e.* electronic submittal) and will not require a permit modification. Technical submittals (*e.g.* workplans, reports) provided in digital format must be in optical media format (Cd or DVD) or through a secured internet port (*i.e.* username/password encryption) when one is available.

Environmental Administrator
Hazardous Waste Program and Permitting, M.S. 4560
Department of Environmental Protection
2600 Blair Stone Road, Tallahassee, Florida 32399-2400

In addition to copies sent to Hazardous Waste Program and Permitting in Tallahassee, submittals in response to postclosure or operating permit conditions shall be sent to:

epost@nwdwaste.dep.state.fl.us

16. All documents submitted pursuant to the conditions of this permit shall be accompanied by a cover letter stating the name and date of the document submitted, the number(s) of the Part(s) and Condition(s) of the permit affected, the E.P.A. I.D. number, and the permit number and project name of the permit involved.

17. All documents proposing modifications to the approved permit and involving the practice of engineering must be submitted to the Department for review and be signed, sealed, and certified by a Professional Engineer registered in the State of Florida, in accordance with Chapter 471, F.S., and Subsection 62-730.220(9), F.A.C. All submittals incorporating interpretation of geological data shall be signed and sealed by a Professional Geologist registered in the State of Florida in accordance with Chapter 492, F.S., and Subsection 62-730.220(10), F.A.C.
18. All work plans, reports, schedules and other documents (“submittals”) required by this permit are subject to approval by the Department prior to implementation. The Department will review the submittals and respond in writing. Upon written approval by the Department, the Permittee shall implement all work plans, reports and schedules as provided in the approved submittal. If the Department disapproves a submittal, the Department will do one of the following.
 - a. The Department will notify the Permittee in writing of the reason(s) why the submittal does not contain information adequate to support the conclusion, alternative, plan, proposal or recommendation, or why the conclusion, alternative, plan, proposal or recommendation is not supported by the applicable criteria. In this case, the Permittee shall submit a revised submittal within 60 days of receipt of the Department’s disapproval unless an alternative deadline is approved in writing by the Department.
 - b. The Department will revise the submittal, or approve the submittal with conditions, and notify the Permittee of the revisions or conditions. In the case of work plans, the Department may notify the Permittee of the start date of the schedule within the revised or conditionally approved work plan.
19. The Permittee shall revise “Part I – General” of the Application for a Hazardous Waste Facility Permit [DEP Form 62-730.900(2)(a)] and submit the revised form to the Department within 30 days of any changes in the Part I information. Changes in the Part I information may also require changes to the Department’s 8700-12FL form.
20. The Permittee may claim that any information required to be submitted by this permit is confidential in accordance with Chapter 403.73, F.S.
21. This permit is transferable only upon written Department approval in accordance with Rule 62-4.120 and Subsection 62-730.290(6), F.A.C., as applicable. The Permittee shall be liable for any noncompliance of the permitted activity until the transfer is approved by the Department. Before transferring ownership or operation of this facility during the term of this permit, the Permittee must notify the new owner or operator in writing of the requirements of 40 CFR Part 264 and Chapter 62-730, F.A.C.
22. The following conditions apply to renewal, modification and revocation of this permit.
 - a. The Permittee shall submit a complete application for the renewal of this permit a minimum of 180 calendar days before the expiration of the permit. The permit renewal application shall be submitted in accordance with Rules 62-4 and 62-730, F.A.C.

- b. The Department may modify, revoke, reissue, or terminate for cause this permit in accordance with Chapters 62-4 and 62-730, F.A.C.
- c. The Permittee may submit any permit modification to the Department for approval. The filing of a request for a permit modification, revocation, reissuance, termination, notification of planned changes, or anticipated noncompliance on the part of the Permittee does not stay the applicability or enforceability of any permit condition.
- d. The Permittee shall submit the application for a permit renewal or modification to the addresses in Part I.15.

- (1) The Permittee shall submit a fee with the permit renewal or modification application that meets the requirements of Rule 62-730.293, F.A.C. A Permittee choosing to pay the fee on an annual basis shall submit the annual fee payment no later than the anniversary date of permit issuance.
- (2) The Permittee shall submit a copy of the cover letter accompanying the permit renewal or modification application and the fee to the following address.

Florida Department of Environmental Protection
Hazardous Waste Program and Permitting
Post Office Box 3070, Tallahassee, Florida 32315-3070

- (3) The Permittee shall also submit notification of fee submittal, or notification of annual fee submittal, to the addresses in Part I.15.a., or by an alternate means (*e.g.*, e-mail) as approved by the Department.
 - (4) The permit renewal or modification application fee may alternately be submitted electronically. If the Permittee intends to submit the application fee electronically, the Permittee shall obtain instructions from the Department on the proper procedures, and shall follow such instructions in making the electronic submittal. Notification per Part I.22.d.(3) is still required.
- e. The timeframes for permit review begin on the date when the Department has received both the permit renewal or modification application and the application fee.
 - f. If the Permittee allows this permit to expire prior to Department acceptance of the certification of postclosure and termination of all corrective action, the Permittee must reapply for a permit in accordance with DEP Form 62-730.900(2), F.A.C.
 - g. Any request to modify a permit for the treatment, storage, or disposal of hazardous waste generated off-site shall include an evaluation of the applicability of, and Permittee's compliance with, the siting criteria of Section 403.7211, F.S., and Rule 62-730.182, F.A.C.

23. If and when the Permittee intends to transfer parcels to third parties, the Permittee may remove a parcel from the Facility covered by this permit, and the Department will approve the removal of the parcel so long as the parcel never contained a contaminated site, or so long as any contamination associated with the contaminated site has been addressed to the satisfaction of the Department. The Department will approve the transfer or removing of a parcel in writing.

- a. The satisfaction of the Department may be conditioned on a sale with certain legal restrictions on the future use and/or remedial activity requirements on the parcel being transferred.
 - b. Following the legal transfer of the property, a permit modification request to transfer the parcel from the permit must be made per Part I.22 within 30 days. A new facility map denoting the current property boundary and new property boundary legal description shall be submitted with the permit modification request.
 - c. Even though a parcel is no longer defined as part of the facility as a result of the permit modification (using the minor modification requirements of Subsection 62-730.290(4), F.A.C.), in the event that a previously unknown contaminated site is found on the parcel, and such contamination resulted from activities which occurred prior to the sale, the Permittee will be responsible for any corrective action along with any other persons who may have legal responsibility for the contamination (see Part V.1.b. regarding discovery of a new SWMU).
24. The following conditions apply to land disposal (placement) of hazardous wastes.
- a. 40 CFR Part 268 and Rule 62-730.183, F.A.C., identifies hazardous wastes that are restricted from land disposal and defines those limited circumstances under which an otherwise prohibited waste may continue to be placed on or in a land treatment, storage, or disposal unit. The Permittee shall maintain compliance with the requirements of 40 CFR Part 268. Where the Permittee has applied for an extension, waiver, or variance under 40 CFR Part 268, the Permittee shall comply with all restrictions on land disposal under this Part pending final written approval of such application.
 - b. Waste identified in 40 CFR Part 268 Subpart C may not be placed in a land disposal unit without treatment unless the requirements of 40 CFR Part 268 Subparts C and/or D are met.
 - c. The storage of hazardous wastes restricted from land disposal in 40 CFR Part 268 is prohibited unless the requirements of 40 CFR Part 268 Subpart E are met.
25. The Permittee is not relieved of responsibility to clean up a release that has migrated beyond the facility boundary where off-property access is denied or revoked.
- a. The Permittee shall use all reasonable efforts, including but not limited to correspondence, telephone calls, personal contacts, drafting and redrafting agreements, and payment of a fee, to obtain access to real property necessary for work to be performed in the implementation of this permit.
 - b. If necessary access cannot be obtained by the Permittee, or if obtained, is revoked by owners or entities controlling access to the properties to which access is necessary, the Permittee shall notify the Department within five business days of such refusal or revocation. The Department may at any time thereafter seek to obtain such access as is necessary to implement the terms of this permit.
 - c. The Permittee shall reimburse the Department for any expenses that the Department is ordered to pay, or that the Department incurs in connection with its efforts to obtain necessary access to said property. The Permittee shall pay these sums to the Department, or arrange a payment schedule with the Department, within 30 days of

demand by the Department. Payments shall be performed in accordance to Part I.22.d.

26. Reserved.

27. Any dispute resolution will be conducted in accordance with Chapter 120, F.S. (Administrative Procedure Act), Chapter 28-106, F.A.C., and the Department's existing rules and procedures.

PART II – OPERATING CONDITIONS (COMPLIANCE-96 CEG/CEIEC)

Part II Subpart A – General Operating Conditions

1. The Permittee shall comply with those sections of 40 CFR Part 124 specified in Subsection 62-730.200(3), F.A.C., 40 CFR Parts 260 through 268, and 40 CFR Part 270 as adopted in Chapter 62-730, F.A.C., until all hazardous waste permitting operations have ceased and the facility has been closed and released from postclosure care requirements and all facility-wide corrective action requirements.
2. The Permittee shall comply with the manifest requirements of 40 CFR 264.71 and 264.72. The Permittee must document the reconciliation of any manifest discrepancies.
3. The Permittee shall notify the Department in writing four weeks prior to receipt of hazardous waste from a foreign source. Notice of subsequent shipments of the same waste from the same foreign source is not required.
4. The owner or operator of a facility that is authorized by the Department to receive hazardous waste from an off-site source (except where the owner or operator is also the generator) must inform the generator in writing that he has the appropriate permit(s) for, and will accept, the waste the generator is shipping.
 - a. The Permittee that receives hazardous waste from an off-site source shall comply with the following notification and reporting requirements.
 - (1) Unmanifested Waste Report: The Permittee shall submit an Unmanifested Waste Report to the Department within 15 days of receipt of unmanifested waste.
 - (2) Manifest Discrepancy Report: If a significant discrepancy in a manifest is discovered, the Permittee shall attempt to rectify the discrepancy. If not resolved within 15 days after the waste is received, the Permittee shall immediately submit a letter report, including a copy of the manifest, to the Department.
5. Sampling and analysis of permitted and new hazardous wastes shall be conducted in accordance with the Waste Analysis Plan of the permit application.

- a. The Permittee is liable for waste profiles supplied to generators.
 - b. Prior to acceptance of new waste codes, a permit modification per Condition I.22 is required. The need for a substantial modification should be evaluated using the criteria in Subsection 62-730.182(4), F.A.C.
6. With respect to ignitable and reactive wastes, the Permittee shall comply with 40 CFR 264.17, 264.176, and 264.198. With respect to incompatible wastes, the Permittee shall comply with 40 CFR 264.17, 264.177 and 264.199.
 7. If this facility has suspected or confirmed environmental contamination where there may be a risk of exposure to the public, then upon direction from the Department the Permittee must comply with the warning sign requirements of Section 403.7255, F.S. and Rule 62-780.220, F.A.C. The Permittee is responsible for supplying, installing and maintaining the warning signs.
 8. The Permittee shall comply with the security provisions of 40 CFR 264.14 and the facility security provisions of the permit application.
 9. Facility personnel must successfully complete the approved training program indicated in the permit application, within six months of employment or assignment to a facility or to a new position at the facility. Verification of this training must be kept with the personnel training records and maintained at the facility. Personnel shall not work unsupervised until training has been completed. The training must be reviewed by facility personnel at least annually. The Permittee shall maintain an updated list of personnel handling hazardous waste and their respective job titles at the facility.
 10. The Permittee shall maintain and operate the facility to minimize the possibility of fire, explosion or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
 11. The Permittee shall comply with the following conditions concerning preparedness and prevention.
 - a. At a minimum, the Permittee shall have the equipment available at the facility which is described in the Prevention and Preparedness Plan (PPP) of the permit application. The Permittee shall visually inspect and maintain the facility emergency and safety equipment (40 CFR 264.32) listed in the PPP, in accordance with 40 CFR 264.15, 40 CFR 264.33 and the permit application, during permitted activities. The Permittee shall remedy any deterioration or malfunction discovered by an inspection, in accordance with the requirements of 40 CFR 264.15(c). A schedule for the inspection of the facility emergency and safety equipment must be maintained as the operating record of the facility. Changes, additions, or deletions to the schedule must be approved in writing by the Department.
 - b. The Permittee shall maintain immediate access to an internal communications or alarm system, fire protection equipment, spill control equipment and decontamination equipment.

- c. The Permittee shall maintain arrangements with State and local authorities as required by 40 CFR 264.37, and with local medical facilities and emergency response personnel. If State or local officials refuse to enter into preparedness and prevention arrangements with the Permittee, the Permittee must document this refusal in the operating record. Authorities/facilities include local fire and police departments, sheriff's office, state police, hospitals, ambulance services and emergency medical technicians, and state and local emergency response centers.
 - d. The Permittee shall maintain aisle space, as required pursuant to 40 CFR 264.35, to allow the unobstructed movement of personnel, fire protection, and emergency response equipment to any area of the facility.
12. The Permittee shall comply with the following conditions concerning the Contingency Plan (CP).
 - a. The Permittee shall immediately carry out the provisions of the permit application, and follow the emergency procedures described by 40 CFR 264.56, whenever there is a fire, explosion, or release of hazardous waste or hazardous waste constituents which threatens or could threaten human health or the environment. The Permittee shall give proper notification if an emergency situation arises and, within five calendar days, must submit to the Department a written report which includes all information required in Condition I.12.b.
 - b. The Permittee shall comply with the requirements of 40 CFR 264.53. Electronic copies of the CP must be submitted to the authorities/facilities in Condition II.A.11.c., provided the entity has the capability to receive electronic submittals.
 - c. Within seven calendar days of meeting any criterion listed in 40 CFR 264.54(a), (b) or (c), the Permittee shall amend the plan and submit the amended plan for Department approval. Any other changes to the plan must be submitted to the Department within seven days of the change. Amendments to the plan must be approved in writing by the Department. All approved amendments or plans must be distributed to the State and local authorities in Condition II.A.11.c..
 - d. The Permittee shall comply with the requirements of 40 CFR 264.55, concerning the emergency coordinator.
 - e. The Permittee shall perform at a minimum, an annual review of the Contingency Plan to ensure that it is up to date and contains current information. The date of review should be noted in the written operating record at the facility.
13. The Permittee shall develop and maintain a Waste Minimization Program Plan. The Permittee shall maintain copies of the certification required by this Condition in the facility operating record for a minimum of three years. The Permittee must certify, no less often than annually, the following.
 - a. The Permittee has a program in place to reduce the volume and toxicity of hazardous waste generated to the degree determined by the Permittee to be economically practicable.
 - b. The proposed method of treatment, storage or disposal is the most practicable method available to the Permittee, which minimizes the present and future threat to human health and the environment.

14. The Permittee shall keep a written operating record at the facility that includes the following.
 - a. The results of any waste analysis.
 - b. Copies of hazardous waste manifests for three years.
 - c. The results of inspections.
 - d. The closure plan, postclosure plan, and remedial action (corrective measures) plans as applicable for each contaminated site, along with cost estimates for each plan.
 - e. Inspections of emergency and safety equipment.
 - f. Biennial reports.
 - g. Personnel training records.
 - h. The Waste Minimization Program Plan and annual certification of waste minimization.
 - i. The description and quantity of each hazardous waste received or generated.
 - j. The location and quantity of each hazardous waste within the facility.
 - k. Notices to generators as specified in 40 CFR 264.12(b).
 - l. A log of dates of operations and unusual events.
 - m. A summary report and details of incidents that require implementation of the contingency plan.
 - n. The date of annual review of the Contingency Plan.
 - o. Monitoring and test data for 40 CFR 264 Subparts AA, BB, and CC requirements.
 - p. Documentation that local officials have refused to enter into preparedness prevention arrangements with the Permittee.

Part II Subpart B – Specific Operating Conditions

1. The Permittee shall comply with the conditions concerning preparedness and prevention outlined in the current approved OB/OD Contingency Plan. The OB/OD Contingency Plan satisfies the requirements of general condition II.A.11.
2. Compliance with Section 8-1 of the OB/OD Contingency Plan satisfies the requirement of general condition II.A.12b.
3. The Record of Review and Amendments in the OB/OD Contingency Plan represent the operating record for facility in regard to the Contingency Plan.
4. The Permittee is allowed to thermally treat range scrap metal in accordance with 40 CFR 266.202(a)(1) at locations on-range in the Transportable Burn Kettle Processor provided the Permittee follows the following condition.
 - a. The Permittee keeps an operating log with a general description of use which should include dates, estimated quantities or amounts treated and location on-range of each use.
 - b. The Permittee will do an inspection of the Transportable Burn Kettle Processor before each use for malfunctions and deterioration. Permittee will remedy any malfunction or deterioration that presents an environmental or human health hazardous prior to operation.

- c. The Permittee will make sure the Transportable Burn Kettle Processor has all particles removed and disposed of properly before moving the unit.
5. The Permittee shall maintain the facility to minimize the possibility of fire, explosion, or any unplanned sudden or non sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment, in accordance with 40 CFR 264.31 and 40 CFR 264.601.
6. The Permittee is allowed to thermally treat military munitions, explosives or PEP-contaminated items by Open Burn (OB) on Range C-62 (and Range C-52N as an alternate location) in the Transportable Burn Kettle Processor (TBKP) in the permit application. The hazardous waste can be generated from sources outlined in the permit application.
7. The Open Burn activities may only be accomplished by Explosive Ordnance Disposal (EOD) personnel and under the following conditions:
 - a. Daylight Hours;
 - b. No electrical storms within 3 miles of the OB unit; and
 - c. No forecast of a major storm.
 - d. Upon completion of the burn, EOD personnel shall inspect the burn kettle and remove particles and dispose of them properly.
 - e. The TBKP also has the capability to thermally process range scrap metal for on-range destruction of residual unexploded ordnance or munitions fragments in accordance with 40CFR 266.202. By thermally treating this material, the Permittee shall verify it as and then recycle as scrap metal in accordance with Department of Defense policy for disposal of ammunition, explosives, and dangerous articles (AEDA). TBKP may be relocated and used for this purpose as required. The Permittee shall maintain records of use. Before relocation of the TBKP, the Permittee shall visually inspect the interior and exterior and if necessary cleaned to remove any visible residue. The Permittee shall follow the requirements of 40CFR Part 266 Subpart M. The Permittee shall use the TBKP to treat hazardous waste only as specifically permitted.
8. The Permittee is allowed to thermally treat by Open Detonation (OD) military munitions at a designated location on Range C-52 North and Range C-62 described in the permit application. The hazardous waste can be generated from sources outlined in the permit application.
9. The OD operations shall only be performed by EOD personnel in accordance with standard Explosive Ordnance Disposal Procedures and under the conditions listed in Specific Condition 2 of this Part.
10. The Net Explosive Weight (NEW) treated by OD operation shall not exceed that outlined in the permit application. One OD event may include multiple detonations, with each detonation limited to 3,000 pounds combined NEW or less and detonations staggered by at least 10 minutes.

11. At the conclusion of the operation the EOD personnel shall visually inspect fragments to determine if energetic residue remains. Those fragments containing residue will be detonated in place.
12. All non-explosive scrap metal produced during the OD operation shall be collected and disposed of or recycled/reused.
13. The Permittee shall comply with waste compatibility requirements of 40 CFR 264.17(b)
14. The Permittee shall provide adequate fire protection to assure confinement and control of any fire resulting from the operation, as specified in the most current Department-approved OB/OD Contingency Plan.
15. The Permittee shall maintain an operating record describing the OB/OD activities. The record shall include the following information:
 - a. Description and quantity of each hazardous waste received and treated at the unit;
 - b. Dates of its treatment;
 - c. Summary reports and details of all incidents that require implementation of the contingency plan at the unit;
 - d. Weather conditions to include humidity, weather forecast, wind speed and wind direction at each event;
 - e. Copies of manifests showing disposition of burn residues disposed of as hazardous waste and/or the quantity of burn residues on site; and
 - f. Details of any problems discovered during inspections conducted and details of remedial actions taken.
16. The Permittee shall maintain compliance with the environmental performance standards listed in 40 CFR 264.601 at all times.
17. Based on the ambient air monitoring performed in the first year of samples collected, the Department has determined that air monitoring is not necessary at this time. The permit may be modified at some future time if the Department determines that air monitoring is necessary.
18. Signage and locked gates are in place at access points of Ranges C-52 and C-62 in compliance with Part I.12.d.(5).
19. Eglin's Contingency Plan, Operating record, and Closure Plan for the OB/OD units shall be kept at Compliance-96 CEG/CEIEC.

Part II Subpart C – Closure Conditions

1. The Permittee shall close the Open Detonation Units on active bombing Range C-62, and second OD unit located on active bombing Range C-52N in a manner that minimizes or eliminates, to the extent necessary to protect human health and the environment, postclosure escape of hazardous waste, hazardous waste constituents, hazardous waste decomposition products, contaminated leachate or run-off to the groundwater, surface waters, or to the atmosphere (40 CFR Part 264.111).

2. The Permittee shall have a written Closure Plan as required by 40 CFR 264.112(a). The Closure Plan and all revisions to the plan must be kept at the facility until closure is completed, certified in accordance with 40 CFR 264.115, and accepted by the Department.
3. Modifications to the approved Closure Plan shall be in accordance with the requirements of 40 CFR 264.112(c) and Rule 62-730.290, F.A.C.
4. The Permittee shall notify the Department within seven calendar days of any determination that actions undertaken as part of closure or associated monitoring programs no longer satisfy the requirements set forth in this permit. If the Department determines that a modification of the permit is required, the Permittee shall, within 60 calendar days of notice by the Department, submit an application for a permit modification in accordance with Part II.C.3.
5. Within 90 days after receiving the final volume of hazardous waste or upon notification by the Department that closure of a unit is required, the owner or operator must treat or remove from the unit all hazardous waste.
6. The Permittee shall complete closure activities within 180 days after notification to the Department of closure and in accordance with the closure schedule in the permit application. Any changes in the time allowed for closure activities or reporting requirements shall require prior written Department approval. At least 30 calendar days prior to initiating physical closure activities, the Permittee shall prepare and submit a Closure Activities Report.
 - a. The Closure Activities Report will be in columnar format (*i.e.* a table or spreadsheet) with columns for “closure activity,” “schedule date,” and “completed date.”
 - b. The Closure Activities Report shall be maintained and updated by the Permittee throughout the closure period, with copies submitted monthly to the Department, unless an alternate submittal schedule is approved by the Department in writing. Each report must be submitted to the Department by the tenth day of each month for the preceding month until the acceptance of physical closure by the Department. These reports can be submitted electronically.
 - c. Any deviation from the schedule or described tasks shall be fully documented in the Closure Activities Report.
7. The Permittee shall notify the Department 45 days prior to the date on which the Permittee expects to begin partial or final closure of a unit(s).
8. The Permittee shall properly decontaminate or dispose of all equipment, structures, and residues used during or resulting from the closure activities.
9. The Permittee shall manage all hazardous wastes, residues, sludges, spilled or leaked waste, or contaminated liquids and soils removed during closure of the unit(s) in accordance with the applicable provisions of 40 CFR Parts 260 through 268, including the manifest requirements. A copy of each manifest required as a result of closure activities shall be submitted to the Department with the Closure Certification.

10. The Permittee shall provide opportunities for site inspections by the Department by informing the Department at least seven days in advance of any major physical closure activity (*e.g.*, unit decontamination or removal, cap installation, soil sampling, soil removal, etc.).
11. Within 30 days of determining that all contaminated soil cannot be practically removed or decontaminated, the Permittee shall notify the Department of such determination. Within 90 days of the determination the Permittee shall submit an application for permit modifications to close the facility as a landfill (land disposal unit) and perform postclosure care as required by 40 CFR 264.
12. Within 60 calendar days of the completion of closure, the Permittee shall submit to the Department, by certified mail or hand delivery, a Closure Certification Report signed by the Permittee and an independent Professional Engineer registered in the State of Florida, stating that the unit has been closed in compliance with the Closure Plan and the conditions of this permit. The Closure Certification must be based on the Professional Engineer's own observation and knowledge of the closure activities. The Closure Certification Report must include, but not be limited to the following.
 - a. Environmental sampling data to verify closure activities.
 - b. Decontamination data.
 - c. Copies of manifests or other appropriate shipping documents for removal of all hazardous wastes and all contaminated residues.
 - d. A description of final closure activities.
 - e. A final Closure Activities Report (Condition II.C.6 of this Subpart).
13. Within 30 calendar days of submitting a Closure Certification Report for a land disposal unit, including a land disposal unit identified under Part II.C.11, the Permittee shall submit to the Department and to the local zoning authority, or the authority with jurisdiction over local land use, a survey plat indicating the type, location, and quantity of hazardous wastes disposed of within the unit with respect to permanently surveyed benchmarks in accordance with 40 CFR 264.116. For hazardous wastes disposed of before January 12, 1981 the owner or operator must identify the type, location, and quantity of the hazardous wastes to the best of the Permittee's knowledge and in accordance with any existing records. This notice is in addition to the requirement to execute a formal land use control (*e.g.*, a restrictive covenant) in order to obtain a site rehabilitation completion order based on restricted exposure risk assumptions under Chapter 62-780, F.A.C.

PART III – POSTCLOSURE CONDITIONS

Not applicable at this time.

PART IV – ENVIRONMENTAL MONITORING CONDITIONS

Part IV Subpart A – General Environmental Monitoring Requirements

1. Environmental monitoring is performed to conduct detection monitoring, ensure that the extent of contamination remains delineated, or to track the progress of corrective action. Monitoring is a dynamic activity and decisions on future actions are dependent upon prior results and site-specific conditions. The ability to alter a monitoring plan based on results and site-specific conditions is essential to a comprehensive and efficient monitoring program. Changes to the Environmental Monitoring Plan (EMP) conditions that follow can be made with written Department approval and will not require a permit modification. The Permittee shall continue to implement the approved EMP.
2. Part IV.A.3 identifies the required elements of a comprehensive EMP. An EMP is comprised of both relatively static and more frequently changing components. EMP components that may frequently change are described in Part IV.A.11 and are to be reported in Environmental Monitoring Reports (EMRs); the most current EMR represents the most current EMP. The Permittee shall ensure that all remaining EMP components are included in the EMR or clearly identified and referenced in the EMR. Note that some items may be more dynamic in nature on a site specific basis, *e.g.*, some items in Part IV.A.3.e.
3. The EMP must address all environmental media as necessary, including groundwater, sediment, soil, and surface water. The EMP, including future revisions, must include the following elements at a minimum. Facilities with a monitoring program in place, but lacking a provision below, will submit identified provisions within 60 days of notification by the Department, or in the next Environmental Monitoring Report as directed.
 - a. The EMP shall include a map(s) showing all contaminated sites, any SWMUs and AOCs in detection monitoring, and associated monitoring wells and piezometers (including recovery or extraction, point of compliance, Temporary Point of Compliance, and background wells), surface water features pertinent to the contaminated site and surface water sampling locations, and any areas subject to soil or sediment sampling. Contaminated sites are the SWMUs and AOCs listed in Appendices A.2, A.3, and A.4.
 - b. A map(s) showing all SWMUs and AOCs shall be submitted to the Department and incorporated by reference into the EMP. The map shall be updated within 60 days of the discovery of a new SWMU (Part V.1.b.) or AOC.
 - c. Well construction information for each well and piezometer in the EMP shall be submitted to the Department and incorporated by reference into the EMP. Well construction information shall also be submitted in an electronic format (*e.g.*, spreadsheet) for inclusion in the Department's WACS database (or its successor). Location of each well or piezometer shall be provided in latitude and longitude. Information on new wells and piezometers shall be submitted within 30 days of installation.
 - d. The EMP shall include a table or tables listing all wells and piezometers to be sampled (or potentially sampled based on results) or measured, surface water

- sampling locations, and soil or sediment sampling locations (or methods for choosing locations such as grid-based) and the following information for each.
- (1) Well or piezometer depth, screened interval, surveyed ground surface elevation and surveyed top of casing elevation; surface water sampling depth(s), and soil and sediment sampling intervals.
 - (2) The regulatory status of each well or piezometer, such as assessment, extraction or recovery, point of compliance, Temporary Point of Compliance, or background well.
 - (3) The frequency of sampling for each location (in all media), such as annual, semiannual, bi-annual, not currently sampled.
 - (4) Wells where groundwater level elevations will be measured (but not sampled).
 - (5) Contaminants of concern to be sampled.
- e. The EMP shall include the following information concerning quality assurance and the laboratory practices.
- (1) A statement that all sampling and analysis activities will comply with Rule 62-160.110(5), F.A.C.
 - (2) A statement that all analyses will be conducted by a laboratory accredited by the National Environmental Laboratory Accreditation Program (NELAP) and certified by the Florida Department of Health.
 - (3) A table of proposed constituents, matrices, and analytical methods.
 - (4) A table of proposed purging and sampling methods.
 - (5) A statement that all records of monitoring information shall include all required items in Chapter 62-160, F.A.C., and Part I.13.c.
 - (6) A statement that all laboratory data will be submitted using the ADaPT quality assurance software.
 - (7) A statement that the sampling crew will follow the Department's most recent Standard Operating Procedures (SOPs) or other sampling program approved pursuant to Chapter 62-160, F.A.C.
- f. The EMP must describe how investigation derived wastes will be managed.
- g. The EMP shall include provisions for maintaining well integrity (well repair and redevelopment) and well security including locks for each well. The Permittee may demonstrate that facility security provisions negate the need for locks at a well(s), subject to Department written approval. All wells beyond the facility property boundary must be kept secure and locked when unattended.
- h. The EMP shall include a schedule for periodic submission of Environmental Monitoring Reports.
4. Wells used as part of an approved EMP may be abandoned with Department approval. The Permittee shall abandon wells in accordance with the requirements of Subsection 62-532.500(4), F.A.C.
 5. The Permittee shall measure groundwater elevations every time any well is sampled as part of the approved EMP. All groundwater elevations must be measured within the

same 24-hour period and prior to the sampling event. These data shall be used to determine the horizontal and vertical groundwater flow direction and flow rate for each monitoring period.

6. Total depths of all sampled wells must be determined by physical measurement to the closest 0.01 foot increment in May of each year to determine if siltation has occurred in any well. Wells are to be redeveloped as necessary.
7. The Permittee shall provide the Department with opportunities to observe groundwater sampling and split samples by providing notification either by telephone, letter, or electronically at least seven calendar days prior to each sampling event.
8. In the event a well is damaged and requires repair (not maintenance), the well shall be repaired or replaced within 30 days, or before the next sampling event, whichever occurs first.
9. All groundwater analyses shall be performed on unfiltered groundwater samples. Analyses on filtered samples may be performed by the facility, but only for its own use, unless shown to be more representative of groundwater conditions [Subsection 62-520.300(9), F.A.C.].
10. All laboratory data will be submitted using the ADaPT quality assurance software. All laboratory datasheets shall be submitted only in electronic format. ADaPT files shall accompany the electronic copy of the EMP, and shall be included in a separate folder labeled ADaPT files. The folder will contain a single Laboratory electronic data deliverable (EDD), a Field EDD, and a copy of the error log that contains all data covered by the Report. Additional information on ADaPT is available at the Department's website: <http://www.dep.state.fl.us>.
11. The Permittee shall submit Environmental Monitoring Reports (EMR) in accordance with the schedule in the approved EMP. This report can be submitted in a combined document with any Remedial Action Status Report required in Part VI of this permit. The EMR should contain the following elements.
 - a. A map showing all contaminated sites and associated monitoring wells and piezometers (including recovery or extraction, point of compliance, Temporary Point of Compliance, and background wells), surface water features pertinent to the contaminated site and surface water sampling locations, and any areas subject to soil or sediment sampling (*i.e.*, Part IV.A.3.a.).
 - b. Reports of any necessary repairs or redevelopment of the wells since the last report.
 - c. Maps of groundwater flow direction(s) and plume delineation(s) (if any) and a table of groundwater elevation data.
 - d. An analysis and evaluation of the current analytical results, including maps, figures, graphs and tables.
 - e. Field sampling logs.
 - f. Laboratory analytical data sheets for the sampling event(s) (electronic copy only).
 - g. An analysis and evaluation of the comprehensive effectiveness of the environmental monitoring program including recommendations to enhance and refine the EMP (*e.g.*,

- the addition or deletion of wells from the plan, changes in sampling frequency at a well, or changes in contaminants of concern).
- h. An updated table(s) containing the information in Part IV.A.3.d. The table shall also indicate the recommendations made in Part IV.A.11.g.
 - i. ADaPT quality assurance electronic files per Part IV.A.10.

Part IV Subpart B – Specific Monitoring Conditions

1. (Restoration-96 CEG AFCEC/CZOE) Environmental monitoring at HSWA Corrective Action SWMUs and AOCs will be conducted in accordance with the most current approved versions of the *Basewide Work Plan* (currently dated December 2012), *SSR* (currently dated February 2015), and the Annual Environmental Monitoring Reports (EMRs), all of which represent the Eglin EMP approved and overseen by the Department's Federal Facilities Program. Compliance with these documents is considered compliance with Part IV.A of this permit.
2. (Compliance-96 CEG/CEIEC) The current environmental monitoring at the regulated units will be conducted in accordance with the most current approved version of the *Sampling and Analysis Plan Ranges C-52 North and C-62 Open Burn/Open Detonation (OB/OD) Units, Eglin Air Force Base, Florida* (currently dated June 2008), *Basewide Work Plan* (currently dated December 2012), *SSR* (currently dated February 2015), and the Annual Environmental Monitoring Reports (EMRs), all of which represent the Eglin EMP for the regulated units. Compliance with these documents is considered compliance with Part IV.A of this permit.

Part IV Subpart C – Specific Groundwater Monitoring Requirements for RCRA Regulated Units

1. Annually in May (with associated EMR submitted in July), the Permittee shall determine the concentration of each constituent from the 40 CFR 264 Appendix IX list, limited to only those analytes in Specific Condition Part IV, Subpart D.3. This sampling shall be conducted at the point-of-compliance well or wells most representative of groundwater quality, as approved by the Department based on the groundwater monitoring conducted pursuant to this part [40 CFR 264.98(g)].
2. The Waste Management Area shall be designated by an imaginary line(s) circumscribing the OD unit of Range C-52N and the OB/OD unit of Range C-62, indicated in Attachments B and C, respectively, dated January 25, 2016.
3. The Points of Compliance shall be the southwest, south and southeast boundaries of Range C-52N (Attachment D, dated January 25, 2016) and the west and southwest boundaries of Range C-62 (Attachment E, dated January 25, 2016).
4. The Point-of-Compliance (POC) wells and background wells for each unit shall be as follows:
 - a. Range C-52N: POC wells—MW-94-52-02 and MW-94-52-03; background well—MW-94-52-01 (Attachment F, dated January 25, 2016); and

- b. Range C-62: POC wells--MW-94-62-02, MW-94-62-03, MW-92-62-04, and MW-92-62-05; background well—MW-94-61-01 (Attachment G, dated January 25, 2016).
 - c. If groundwater elevations indicate a change in groundwater flow direction of the surficial or any other affected aquifer, the Department may require the installation of additional monitoring wells and revisions to the groundwater monitoring program.
5. Upon permit issuance, the facility shall be in detection monitoring in accordance with 40 CFR 264.98.
 6. The Compliance Period is the number of years equal to the active life of the OD unit of Range C-52N and the OB\OD unit of Range C-62 including any waste management activity prior to permitting, and the closure period. If the Permittee is engaged in a corrective action program at the end of the Compliance Period, the Compliance Period is extended until corrective action is complete.
 7. All POC wells and background wells shall be sampled, analyzed, and results reported in accordance with the schedule as specified in the approved Environmental Monitoring Plan required by Subpart B of this Part until the Department accepts the Certification of postclosure.
 8. The detection monitoring concentration for groundwater shall be as follows.

The contaminant detection monitoring concentrations for RDX, 2-amino-4, 6-dinitrotoluene, 4-amino-2, 6-dinitrotoluene, 2,4-dinitrotoluene were approved in a permit issued September 1, 2006. These levels are in effect provided the Range Test Areas C-52 and C-62 remain under Eglin control and are used as munitions training and testing sites. If these numbers are exceeding in the downgradient wells, additional evaluation will be conducted.

CAS #	Contaminant of Concern	CTL (ug/L)
35572-78-2	2-amino-4, 6-dinitrotoluene	4
19406-51-0	4-amino-2, 6-dinitrotoluene	4
99-65-0	1,3-dinitrobenzene	0.7
121-14-2	2,4-dinitrotoluene	0.6
606-20-2	2,6-dinitrotoluene	0.2
88-72-2	2-nitrotoluene	70
99-08-1	3-nitrotoluene	140
99-99-0	4-nitrotoluene	70
99-35-4	1,3,5-trinitrobenzene	210
118-96-7	2,4,6-trinitrotoluene	10
71-43-2	Benzene	1
108-88-3	Toluene	40
100-41-4	ethylbenzene	30
1330-20-7	xylenes	20
2691-41-0	HMX	350

121-82-4	RDX	10
14797-55-8	Nitrate	10,000
14797-65-0	Nitrite	1,000

Part IV Subpart D – Cleanup Target Levels

1. Final cleanup target levels at each site are designated at the time a final remedy is approved. Cleanup target levels are listed in the document *Guidelines for Contaminants of Potential Concern (COPC) Identification* that is overseen and approved by the Department’s Federal Facilities program. Compliance with that document is considered compliance with this permit.

**PART V – CORRECTIVE (REMEDIAL) ACTION CONDITIONS (RESTORATION - 96 CEG
AFCEC/CZOE)**

Subpart A – General Corrective Action Conditions

1. The Conditions of this Part apply to the following.
 - a. The SWMUs and AOCs identified in Appendix A.
 - b. Any additional SWMUs or AOCs discovered during the course of groundwater monitoring, field investigations, environmental audits, or other mean. As used in this Part, the terms “discover”, “discovery”, or “discovered” refer to the following.
 - (1) The date the Permittee visually observes evidence of a new SWMU or AOC.
 - (2) The date the Permittee visually observes evidence of a previously unidentified release of contaminant(s) to the environment.
 - (3) The date the Permittee receives information from a credible source of the presence of a new release of contaminant(s) to the environment.
 - c. Contamination that has migrated beyond the facility boundary, if applicable.
2. The Permittee shall comply with the notification requirements for the discovery of a new SWMU in Part I.12.c.
3. Upon notification by the Department, the Permittee shall prepare and submit a Confirmatory Sampling (CS) Work Plan for known, suspected, or newly discovered sites. The Work Plan shall be submitted within 60 calendar days of notification by the Department unless the notification letter establishes a different time frame.
 - a. The CS Work Plan shall include schedules for implementation and completion of specific actions necessary to determine whether or not contamination has occurred in any potentially affected media. In order to partly or wholly satisfy the CS requirement, previously existing data may be submitted with the work plan for the Department’s consideration.

- b. In accordance with the schedule in the approved CS Work Plan, or no later than 60 calendar days after Department's written approval of a CS Work Plan, the Permittee shall submit a Confirmatory Sampling Report identifying those sites that are contaminated and those sites that are not contaminated. The CS Report shall include an analysis of the analytical data to support all determinations. Based on the results of the CS Report, the Department will determine the need for further investigation at sites covered in the CS Report and notify the Permittee in writing.
4. De Minimis discharge is a release of a contaminant(s) that is removed from the soil, sediment, surface water, and groundwater to cleanup target levels or background concentrations within 30 days of discovery of the release. If the Permittee intends to treat a discharge under the De Minimis discharge provision of Rule 62-780.550 or Rule 62-780.560 F.A.C., the Permittee must meet the notification requirements of Part I.12.c, and inform the Department that a De Minimis action is underway. A De Minimis Remediation Report must be submitted to the Department within 90 days of discovery of the release. The report must include a description of all actions taken in response to the discharge and the information required by the Interim Source Removal Report pursuant to Subsection 62-780.500(7)(a), F.A.C.
5. If contamination is confirmed by the Confirmatory Sampling Report, the Department will notify the Permittee to commence site rehabilitation in accordance with Rule 62-730.225 and Chapter 62-780, F.A.C., for all SWMUs and/or AOCs ("contaminated sites") identified in the notification. The Permittee shall commence and complete site assessment in the manner and within the time limits set forth in Rule 62-780.600, F.A.C., unless the notification letter specifically establishes a different time frame to commence or complete site assessment. An alternative schedule can be implemented with written Department approval.
6. The Permittee shall conduct Emergency Response Actions in accordance with Subsections 62-730.225 and 62-780.500, F.A.C. The Permittee may, or upon notification by the Department, shall conduct an Interim Source Removal action in accordance with Subsections 62-730.225 and 62-780.500 F.A.C. for any release, SWMUs, or AOCs determined necessary to minimize or prevent further migration of contaminants or to limit human or environmental exposure to contaminants.
7. If the Department or the Permittee at any time determines that any approved work plan no longer satisfies the requirements of Rule 62-730.225 or Chapter 62-780, F.A.C. or this permit for prior or continuing releases of contaminant(s) to the environment, the Permittee shall submit an amended work plan to the Department within 60 calendar days of such determination.

Subpart B – Specific Corrective Action Conditions (Restoration-96 CEG AFCEC/CZOE)

1. Corrective action at HSWA Corrective Action SWMUs and AOCs will be conducted in accordance with the *Basewide Work Plan* approved and overseen by the Department's Federal Facilities Program. Compliance with this plan is considered compliance with Part V.A of this permit.

2. Eglin AFB maintains a Sites Status Report (SSR) that contains information on all of Eglin's SWMUs and is regularly updated. In lieu of maintaining a separate SWMU site listing in this Permit, the SSR represents the Eglin AFB Site Inventory. To address management of schedules and track progress at various sites, Eglin has established a tracking and projection site status spreadsheet. An example of the spreadsheet is also included in the SSR. Therefore, the SSR represents Eglin's Management Action Plan (MAP) and Corrective Action Management Plan (CAMP). The Eglin Installation Restoration Program Partnering Team (Eglin Tier I Partnering Team) will be used in the corrective action decision-making concerning these sites. This Team maintains the tracking and projection site status spreadsheet (MAP/CAMP).
3. The HSWA Corrective Action portion and conditions of this permit have been integrated to meet the intent of CERCLA. The integration between RCRA and CERCLA applies to the SWMUs/AOCs identified as requiring Corrective Action in the Appendix A.
4. In coordination with the FDEP and USEPA Region IV, Eglin AFB generates and periodically updates a document entitled *Guidelines for Contaminants of Potential Concern (COPC) Identification*. The intent of this document is to provide a systematic decision-making process on identifying COPCs at Eglin SWMUs and AOCs using applicable screening values and ARARs, as well as Eglin-specific naturally occurring background concentrations of selected constituents in soil and groundwater.

PART VI – REMEDY SELECTION AND IMPLEMENTATION

Part VI Subpart A – General Remedy Selection and Implementation Conditions

1. Within 90 calendar days of Department approval of a Site Assessment Report or Site Assessment Report Addendum the Permittee shall submit a Remedial Action Plan developed in accordance with Chapters 62-780 and 62-730, F.A.C. Remedial Action Plans may be performance based, including remediation options to be implemented based on changing conditions at the site.
2. The Permittee shall apply for a permit modification in accordance with Part I.22. of this permit within 30 days of a Department approved final remedy unless an alternative permit modification schedule has been approved by the Department. Final approval of remedial action which is achieved through interim measures shall be in accordance with this condition.
3. The Remedial Action Plan shall include a provision for the Permittee to submit periodic Remedial Action Status Reports in accordance with Subsection 62-780.700(12), F.A.C. The intent to implement a different approved remedy in a performance based Remedial Action Plan can be provided in the Remedial Action Status Report. Proposals to modify a previously approved remedy in a performance based Remedial Action Plan can be provided in the Remedial Action Status Report and implemented with written Department approval. The Remedial Action Status Reports may be combined with any Environmental Monitoring Report required by Part IV.

4. When site rehabilitation (remedial action) is complete, the Permittee shall submit to the Department a Site Rehabilitation Completion Report in accordance with Subsection 62-780.750(6), F.A.C. Site Rehabilitation Completion Reports can be part of a combined document with the Remedial Action Status Report.
5. (Compliance-96 CEG/CEIC) For site rehabilitation involving the cleanup of groundwater contaminated by a release from a designated regulated unit, the Permittee must demonstrate that the concentration of constituents of concern remain below cleanup goals for three consecutive years after active remediation has ceased as per 40 CFR 264.100.(f).
6. When appropriate, the Department will approve completion of site rehabilitation by inclusion in a permit renewal, permit modification, or separate Site Rehabilitation Completion Order.

Part VI Subpart B – Selected Remedies (Restoration-96 CEG AFCEC/CZOE)

1. Remedy selection and approval is recorded in the Sites Status Report maintained by Eglin AFB, and approved and overseen by the Department’s Federal Facilities Program. The SSR contains information on all HSWA Corrective Action SWMUs and AOCs. Specific remedies for these units are detailed in this document.
2. During fiscal year 2016, the Permittee will prepare a Five-Year Review Report for each applicable site. These reports will evaluate remedy effectiveness and be submitted to the Department, regardless of when the previous Five-Year Review Report had been submitted. Subsequent reports will be generated on a five-year cycle thereafter. Applicable sites are listed on Appendices A.4 and A.5. The Permittee may at any time present additional information for remedy modification, including but not limited to discontinuing the remedy.
3. Eglin AFB is responsible for implementing, monitoring, maintaining, reporting upon and enforcing the remedies under this permit, including Land Use Controls.

**APPENDIX A - SUMMARY OF FACILITY SITES - SOLID WASTE MANAGEMENT UNITS (SWMUs)
 AND AREAS OF CONCERN (AOCs)**

Details concerning the status of individual sites at Eglin AFB are provided in the Sites Status Report listed above.

A.1 List of SWMUs / AOCs requiring Confirmatory Sampling				
SWMU/AOC Number/Letter	SWMU/AOC Name	SWMU/AOC Comment and Basis for Determination	Dates of Operation	Potentially Affected Media
There are no units identified as requiring Confirmatory Sampling at this time pursuant to this permit.				

A.2 List of SWMUs / AOCs requiring a Site Assessment (a/k/a RCRA Facility Investigation [RFI]) or a Risk Assessment

SWMU/AOC Number/Letter	SWMU/AOC Name	SWMU/AOC Comment and Basis for Determination	Dates of Operation	Potentially Affected Media
SS-284	CV-22 Crash Site	Approximately 1500 gallons of JP-10 fuel released as a result of aircraft crash	June 2012	Soil, groundwater
SS-285	Abandoned Fuel Transfer Line	Historical release of fuel from an abandoned-in-place Main Base fuel line	Abandoned in middle 1990s	Soil, groundwater

A.3 List of SWMUs / AOCs requiring a Remedial Action Plan or Natural Attenuation with Monitoring Plan (a/k/a RCRA Corrective Measures Study [CMS])

SWMU/AOC Number/Letter	SWMU/AOC Name	SWMU/AOC Comment and Basis for Determination	Dates of Operation	Potentially Affected Media
------------------------	---------------	--	--------------------	----------------------------

There are no units identified at this time requiring a Remedial Action Plan or a Natural Attenuation with Monitoring Plan.

A.4 List of SWMUs / AOCs implementing a Remedial Action Plan or Natural Attenuation Monitoring Plan (a/k/a Corrective Measures Implementation [CMI])

SWMU/AOC Number/Letter	SWMU/AOC Name
FT-28	Eglin Main Base Old Fire Training Area
SS-01	Radar Site A-20 (formerly AOC-21)
LF-03	Eglin Main Landfill (D1)
LF-05	Eglin Main Landfill (D3)
LF-51	Upper Memorial Lake Landfill (formerly AOC-28)
ST-69	Bldg. 3073, Waste Oil Tank (formerly AOC-38,AOC-45, POI-333)
SS-86	Exterior Electric Ship/Entomology Shop (formerly AOC-86, AOC-109, DP-97)
DP-257	Postl Lake Prison Camp Drum Disposal Area (formerly POI-341)
DP-268	Eglin Main Base POL Debris Pile (formerly POI-394)
SS-283	JP-8 Spill Site

A.5 List of SWMUs / AOCs at which Site Rehabilitation Completion Determinations With Controls have been made	
SWMU/AOC Number/Letter	SWMU/AOC Name
LF-08	Receiver Area Landfill (D7)
DP-09	Mullet Creek Drum Disposal Area
LF-10	Field 2 North Landfill
SS-25	C-52A Herbicide Test Area
SS-26	Hardstand 7
OT-83	Cattle Dipping Vat – Pocosin Pond (formerly AOC-113)
DP-84	Jack Lake Limb Disposal Area (formerly AOC-69)

~~Addressed under State Landfill Closure Permit.~~

³ Deferred to Nuclear Regulatory Commission License.

⁴ Addressed under 40CFR Part 264 Subpart X Operating Permit (OT-46/C-52N & OT-47/C-62).

⁵ Deferred to FDEP Wastewater Permit.

⁶ Addressed under Military Munitions Response Program (POI-502 and POI 600 SWMUs).

⁷ Deferred to FDEP Consent Order.

⁸ Former Site FT-27 was renamed when transferred to POL program.

⁹ AOCs-17, -18, -19 and -20, SS-23, -24, 107, 108, 109 and ST-63 formerly comprised OU-1, which is now recognized as LF-03.

¹⁰ ST-72 and ST-72B were closed and replaced with SWMU SS-275, because of a new release of petroleum product.

¹¹ No COPC detected. These sites are under Eglin's internal LUC.
¹² DP-97 has been combined with SS-86 and is now referred to as SS-86.
¹³ Third-party Consent Order
¹⁴ Closed under the Low-Level Radioactive Material (LLRM) Program.
Note: OT-272, POI-371-385 and POI-394 are unused IRP site numbers.

A.8 List of RCRA Regulated Unit(s) Undergoing Detection Monitoring
