

Want to do something *FUN* and *EMPOWERING*?

EPA will be holding a public meeting on Feb. 14, 2017
(**Valentine's Day**) to receive input on its efforts to establish
the scope of risk evaluations for 10 toxic chemicals including
the solvents TCE and PCE. This is a great opportunity to raise
awareness about the risk of **infant HEART defects** from
prenatal exposure to these highly toxic compounds.

MAIL your paper heart Valentine to:

EPA Office of Pollution Prevention and Toxics
c/o Citizens for Safe Water Around Badger
E12629 Weigands Bay South
Merrimac, WI 53561

We will **HAND DELIVER** your Valentine at the Feb. 14 meeting in Washington DC!

Protect Infant Heart Health!

*The most frequent health problem in children who were exposed in
the womb from their mother drinking water contaminated with TCE
and/or PCE at Camp Lejuene is major **HEART** defects. Other serious
health effects include leukemia, small gestational age, low birth
weight, and fetal death. I write because _____*

My name: _____
