The bill prohibits the use of class B firefighting foam that contains intentionally added perfluoroalkyl and polyfluoroalkyl substances (PFAS foam) for training purposes and creates a civil penalty for doing so.

The bill also creates the "Firefighting Foams Control Act" (act) which:

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 hereby finds and declares that:

4 (a) The historic use of perfluoroalkyl and polyfluoroalkyl  
5 substances, known as PFAS chemicals, in Class B firefighting foams has  
6 contaminated the drinking water of nearly 100,000 Coloradans, including  
7 five water systems down-gradient from Peterson Air Force Base, and  
8 volunteer firefighting station wells at the Sugarloaf Fire District in  
9 Boulder county. The full extent of contamination in Colorado has not yet  
10 been determined.

11 (b) PFAS chemicals do not break down in the environment and  
12 are toxic to people and wildlife at very low levels. Ingesting even small  
13 amounts can cause cancer and other serious health problems. Exposure  
14 to PFAS chemicals is linked to kidney and testicular cancer, thyroid  
15 problems, pregnancy complications, high cholesterol, and immune system  
16 disorders. Firefighters and first responders are exposed to these chemicals

1 at work and nearly every American has measurable amounts in their  
2 bodies.

3 (c) Removing PFAS chemicals from drinking and groundwater  
4 supplies is expensive and treatment must continue for decades. The  
5 Widefield Aquifer in Fountain, Colorado, is permanently contaminated  
6 with PFAS chemicals.

7 (d) PFAS chemicals are not necessary to put out high temperature  
8 fires. Major airports like London Heathrow have successfully used  
9 fluorine-free Class B firefighting foams for years, including to combat  
10 active fires. Washington state will ban the sale of Class B firefighting  
11 foams with intentionally added PFAS chemicals for residential fires in  
12 2020.

13 (e) In addition to handling PFAS chemicals in emergencies and  
14 in training, PFAS chemicals are used on firefighter personal protective  
15 equipment. Both turnout gear and station ware have tested positive for  
16 PFAS chemicals. Scientists and health experts have determined the  
17 hazard this poses for first responders.

18 (2) Therefore, it is the intent of the general assembly to limit the  
19 use of PFAS chemicals by prohibiting the sale of Class B firefighting  
20 foams with intentionally added PFAS chemicals, in certain circumstances,  
21 by August 2, 2021; prohibiting training with these foams; and by  
22 requiring manufacturers to disclose whether the personal protective  
23 equipment they sell contains PFAS chemicals.

24 **SECTION 2.** In Colorado Revised Statutes, **add** 24-33.5-1233 as  
25 follows:
