2 Badger Road
Baraboo, WI 53913-5000

Subject: Soil Testing for Dinitrotoluene Isomers

Dear Ms. Kenney:

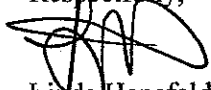

This letter is to inform you the Department is withdrawing its requirement to sample soil for the presence of the following dinitrotoluene (DNT) isomers: 2,3-DNT; 2,5-DNT; 3,4-DNT; and 3,5-DNT. DNR first required soil sampling for these isomers in a letter dated September 15, 2011.

It has since come to our attention that the United States Army and the United States Environmental Protection Agency (EPA) are currently examining the issue of testing for these isomers in soils on a nationwide basis through EPA's "Technical Support Project, Federal Facilities Forum".

DNR will defer any further action on this matter until after the deliberations by the Federal Facilities Forum have been completed.

Please contact me at 608-275-3310 if you have any questions regarding this decision.

Respectfully,

Linda Hanefeld
South Central Region
Remediation and Redevelopment Team Supervisor
